

KIHUN KIM

SOFTWARE ENGINEER

PROFILE

I am a person who enjoys learning and challenging new things. Currently I work as a frontend developer. I build high-performing applications for frontend component with organized architecture. For my future career, I put my effort to become a person who can give good influence to others. For that, I'm making a software engineering project and share my source code introduction in Github repository continuously for everyone. I will also live with a goal to increase my value on my own by creating my own contents and stories.

KEY COMPETENCIES

- Front-End / Full-Stack Development
- Quality assurance (QA) testing
- Leadership experience
- Team management / Communication
- 3 proficient language skills
